Quality Assurance (QA) Checklist

Milestone 4 – Module 7: Testing & Validation

Project: Hospital Operations & Patient Analytics Dashboard

Testing outcome: All reported test areas were checked and found to be functioning correctly.

1. QA Testing Scope

This checklist covers the four analytical dashboards and the supporting About and Help pages, together with KPI calculations, filters, navigation, dashboard interactions, and patient-flow analytics. The project specification identifies KPI validation, healthcare metric verification, dashboard interaction testing, and patient-flow validation as the core Module 7 testing activities.

2. QA Checklist

QA ID	Area / Component	Test Item	Expected Result	Status
QA-01	Hospital Overview	Hospital performance KPI cards	KPIs display correctly and consistently	PASS
QA-02	Hospital Overview	Admissions overview	Admissions information displays correctly	PASS
QA-03	Hospital Overview	Occupancy monitoring	Occupancy information displays correctly	PASS
QA-04	Hospital Overview	Readmission analysis	Readmission analysis displays correctly	PASS
QA-05	Hospital Overview	Operational trends	Trend visual responds correctly	PASS
QA-06	Patient Flow	Admission trends	Admission trends display correctly	PASS
QA-07	Patient Flow	Discharge tracking	Discharge information displays correctly	PASS
QA-08	Patient Flow	Patient movement analysis	Patient movement analytics display correctly	PASS
QA-09	Patient Flow	Average stay analysis	Average stay information displays correctly	PASS
QA-10	Patient Flow	Peak patient load	Peak-load information displays correctly	PASS
QA-11	Department Analytics	Department performance	Department performance displays correctly	PASS
QA-12	Department Analytics	Patient volume by department	Department volumes display correctly	PASS
QA-13	Department Analytics	Readmission by department	Department readmissions display correctly	PASS
QA-14	Department Analytics	Efficiency comparison	Department efficiency comparison works correctly	PASS
QA-15	Department Analytics	Treatment capacity	Capacity analysis displays correctly	PASS

QA ID	Area / Component	Test Item	Expected Result	Status
QA-16	Resource Utilization	Bed utilization	Bed utilization displays correctly	PASS
QA-17	Resource Utilization	Staff allocation	Staff allocation information displays correctly	PASS
QA-18	Resource Utilization	Equipment utilization	Equipment utilization displays correctly	PASS
QA-19	Resource Utilization	Capacity planning	Capacity-planning insight displays correctly	PASS
QA-20	Resource Utilization	Resource availability	Resource availability displays correctly	PASS
QA-21	About	About page access	Page opens and content displays correctly	PASS
QA-22	Help	Help page access	Page opens and guidance displays correctly	PASS
QA-23	Navigation	Dashboard navigation controls	Navigation between pages works correctly	PASS
QA-24	Filters	Global / dashboard filters	Selected filters update relevant visuals correctly	PASS
QA-25	Interactions	Dashboard interactions / actions	Interactive controls respond correctly	PASS
QA-26	Integration	Dashboard linking	Linked dashboard pages work correctly	PASS
QA-27	KPI Validation	KPI calculations	KPI results are accurate and consistent with the project data	PASS
QA-28	Patient Flow Validation	Patient-flow analytics	Patient-flow measures and visuals behave correctly	PASS
QA-29	Visual Quality	Labels, titles and visuals	Visual content is readable and displayed correctly	PASS
QA-30	Overall	Major functional issues	No major dashboard issues identified	PASS

3. QA Summary

Metric	Result
Total QA checks	30
Passed	30
Failed	0
Major issues identified	0
Overall QA status	PASS

4. QA Conclusion

The completed QA checklist indicates that all tested MedTrack dashboard components and supporting pages are functioning correctly. No major functional issues were identified during the reported validation. The project therefore satisfies the Module 7 QA objective based on the testing performed.
